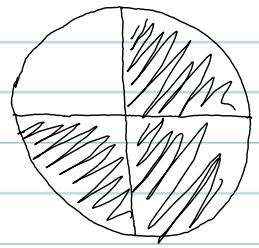
Bravo 4 **Review** 9/8/09

Amandia K.



Shaded $= \frac{3}{4}$

Non Shaded $= \frac{1}{4}$

Shaded + Non Shaded $\Rightarrow \frac{3}{4} + \frac{1}{4} = \boxed{1}$

* To +, - you MUST have a Common Denominator *

Example: $\frac{1}{4} + \frac{2}{3} = \frac{3}{12} + \frac{8}{12}$. 3 and 8 were found by Cross Multiplying

Example: $\frac{3}{5} = \boxed{\frac{15}{25}}$. 15 was found by multiplying 5 and 3

Example: $\frac{3}{5} + \frac{1}{4} = ? \rightarrow \frac{3}{5} = \boxed{\frac{12}{20}} + \frac{1}{4} = \boxed{\frac{5}{20}}$ $\frac{12}{20} + \frac{5}{20} = \boxed{\frac{17}{20}}$

* When Multiplying fractions go straight across *
